PRIMARY CARE SERVICES

We offer comprehensive healthcare services, including preventive care, lab testing, diagnosis and treatment of common illnesses, chronic disease management, referrals to specialists, basic procedures, patient education, health promotion, follow-up care, and coordination of healthcare services. Our office is your first point of contact for non-emergency healthcare needs, providing personalized and continuous care for our patients.

LAB SERVICES

Experience comprehensive care at our facility with our in-house lab services, where you can undergo the diagnostic testing that you need and meet with your healthcare provider all under one roof. Our convenient location eliminates the hassle of traveling to different places for blood draws, urinalysis, and consultations.

SEMAGLUTIDE WEIGHT LOSS PLAN

Semaglutide for weight loss acts by slowing down the emptying of the stomach. This reduced rate of stomach emptying sends a signal of satiety to the brain, curbing food intake and suppressing appetite.

- Weekly health coaching visits with weigh-ins and body composition analysis.
- Prescription for weight loss injection Semaglutide, a highly effective new medication with weight loss results similar to bariatric surgery.
- Overview of proper nutrition, meal plans.
- Weekly MIC and B12 injections.

IV VITAMIN THERAPY

Intravenous (IV) vitamin drip therapy is a safe and effective way to deliver nutrients, vitamins, and medications directly to your bloodstream. This technique bypasses the digestive system, ensuring almost 100% absorption.

INJECTABLES AND FILLERS

- Botox Cosmetic
- JUVÉDERM® Fillers

These minimally invasive treatments are commonly used for cosmetic purposes to achieve a more youthful and rejuvenated appearance.

PRP INJECTIONS

For PRP Injections we use your own blood platelets prepared in the Emcyte PurePRP system to deliver over 1 billion platelets per mL. Growth factors stimulate natural collagen production in the skin, and hair growth in areas of hair loss/thinning. PRP for hair loss stimulates inactive hair follicles into an active growth stage. This is an entirely natural treatment with little risk or downtime. A series of 3 sessions a month apart is recommended. A natural alternative to the use of drugs and invasive surgeries.

SCLEROTHERAPY

This is a highly effective treatment that we offer for varicose and spider veins. We utilize this minimally invasive procedure to eliminate unsightly veins safely and successfully, resulting in smoother, more beautiful legs. Experience the confidence and renewed vitality that sclerotherapy can provide.
